[EXTERNAL EMAIL]

Good morning,

TC Energy will be hosting an open house to share information about the proposed Pumped Storage Project. Please attend to learn more about the proposed project and meet TC Energy representatives who will be present to answer your questions and listen to your feedback. Please see the attached postcard for more information.

Wednesday, December 11, 2019

Meaford and St. Vincent Community Centre – Auditorium – 151 Collingwood Street, Meaford

- **5:30 p.m. Doors open**
- **6 – 6:30 p.m. Presentation**
- **6:30 – 9 p.m. Drop-in style open house**

At 6 p.m., TC Energy will provide an overview presentation of its proposed project. Following the presentation, TC Energy representatives will be available to provide information on the project, answer your questions and listen to your feedback.

About the proposed project

*TC Energy is in the early stages of determining if a Pumped Storage Project can be developed on the Canadian Army's 4th Canadian Division Training Centre, in the Municipality of Meaford. The project would provide 1,000 MW of flexible, clean energy to Ontario's electricity system using a technology known as pumped storage. It would be designed to store electricity when it is available in excess of our needs – typically electricity that would otherwise be wasted or exported at a loss. That stored energy would then provide emission-free electricity back to Ontarians when they need it most. There are numerous levels of assessment and approvals required before this concept could become a reality. **There will be many opportunities to provide feedback and input, including additional open houses being planned for the new year.***

Please let me know if you have any questions. We look forward to seeing you December 11th.

Best regards,

Sara Beasley
