

---

John...in this day and age it is extremely important that consideration be given to the increasing use of cycling as transportation and recreational purposes. Safety should be a major concern in you planning for both cyclists and motorists and bike lanes a priority in any road reconstruction and development.

In Spain where we spent two weeks cycling last year roads there not only had wider bike lanes than your proposed lanes but also signs advising driver to allow 1.5m for cyclists.

More and more cyclists and drivers occupy space on our Blue Mountain and Grey Bruce roads each year please make it safer and with fewer incidents by adding proper bike lanes.

Please consider this letter as support for other deputations for wider bike lanes.

Your very truly

D`Arcy DeGeer-Dana DeGeer – Patricia DeGeer --Garry DeGeer
