

Report CCR-PCD-07-16

To: Chair McQueen and Members of the Planning and Community Development Committee

From: Sim Salata, Collections Manager

Meeting Date: February 16, 2016

Subject: **To update the Committee on the status of the permanent collection inventory and to recommend missing artefacts for deaccession**

Status: Recommendation adopted by Committee as presented per Resolution PCD39-16; Endorsed by County Council per Resolution CC34-16;

Recommendation(s)

WHEREAS the artefact inventory of the Grey Roots Museum permanent artefact collection is complete and their records updated;

AND WHEREAS a large number of artefacts have not been found and are presumed to have been destroyed in the 2001 artefact storage building fire or otherwise been physically compromised, or their histories impossible to identify;

NOW THEREFORE BE IT RESOLVED THAT the artefacts recommended for deaccessioning in Report CCR-PCD-07-16 be deaccessioned from the Grey Roots Museum's permanent artefact collection.

Background

The Museum has been collecting artefacts since 1955, first under the auspices of the Grey Owen Sound Museum and, after 2004, as Grey Roots Museum and Archives.

In 2008, Grey Roots Museum and Archives Collections staff began a top-to-bottom inventory of its entire permanent artefact collection as a basic project of collections management in order to address the following:

- A concern for the integrity of the data in the collections management database;
- A significant proportion of the collection for which there were no photographs or artefact condition reports; and

- A need to achieve physical and intellectual control of the collection to prepare for a Collections Plan which can ultimately be used to support future Interpretive and Strategic Plans.

The objectives of the inventory were:

- To view every artefact in the permanent artefact collection;
- To verify/update/add basic inventory-level data about every artefact in the collection
- To verify/update/add the location of every artefact in the collection; and
- To take at least one high quality digital photo of every artefact in the collection.

With the help of multiple volunteers, co-op students, interns and summers students, staff finished the inventory in the autumn of 2013.

As a result of the inventory, and as of the date of this report, there are 16,131 artefact records in the permanent artefact collection. However, 846 of these artefacts are unaccounted for due to several factors, the chief one believed to be a fire in February 2001 in a large storage building (see attached list entitled *Unfound After Inventory*). All of the missing artefacts were added to the collection before the museum's move to the current Grey Roots location.

Staff would like to deaccession the missing artefacts (remove them from the permanent artefact collection) and move their associated records from the collection database to the Deaccessioned Items file within the database, on the grounds that the inventory constituted appropriate due diligence to verify that, for whatever reason, the artefacts are not physically present in the collection, and that there is no reasonable prospect of them ever again being in the collection. By taking this step, it will improve the integrity of the collections management database, in order that staff can work effectively with the existing artefacts and their records.

After this step is taken, museum collections staff will begin working on a collections plan that will address various aspects of the museum collections (Permanent Artefact collection, Education Collection and Reference Collection) and direct future collecting activity for the next five to ten years. A collections plan formulates a vision for the collection, then maps out how to achieve that vision. Collections plans can help museums control the growth of their collections in a quality-controlled and logical manner.

Financial / Staffing / Legal / Information Technology

Considerations

Collections staff will be allocating the majority of 2016 to formulating a Collections Plan consisting of a conceptual framework that aligns with Grey Roots' mission, and identifying the strengths, gaps, needs, limits and overlaps of and within the permanent artefact collection and the resources needed to achieve Grey Roots' collecting goals.

Other departmental staff will be required to have input as the framework will be organized by interpretive themes that will guide Grey Roots' exhibits, programming and research, as well as its collecting.

It is anticipated that as part of this process, a report will come forward identifying a number of artefacts that have been collected since 1955 that are beyond Grey Roots' collecting scope and are eligible for de-accessioning.

Link to Strategic Goals / Priorities

Achieving excellence in governance and service

Securing our place as Ontario's recreation jewel

Respectfully submitted by,

Sim Salata
Collections Manager
