Re: **GOOD WORK**
Bowles Bluff Hill Makeover

Dear Friends:

Big admiration and thanks to everyone involved in The New Bowles Bluff Hill.

It must have been a devil of a job, but it sure came out 99% - striping burbles at east end, ends of the bridge and right at the crest are the only apparent off-perfects, but those are readily corrected.

Especially fine was the way the project was scheduled to achieve completion just before we all totally lost it over the delays. At least, that's how it was for me; perhaps you had to put up with a few curmudgeonly citizens whose thresholds were lower than mine.

I foresee two problems:

1. More spent on plowing, sanding and salting the slick new mirror surface, and
2. Lots of complaints over long boarders, who must have been salivating to see this new primo run developing. I've already passed a flight of downbound cyclists who could scarcely contain their glee.

I moved to the country so I could rough-road it, but now I feel like I'm on Poplar Plains Road in TO.

Which is wonderful.

This is magnificent work. Please tell that to committee, staff, contractors and all on-site producers.

Then take a little credit yourselves.

Thank you very much,

Peter Ferguson
