Warden Barfoot and Grey Highlands Council Members,

The morning news reported that Bruce County is removing mention of wind turbines from its Official Plan. It's important to see the same thing happen in Grey County and I would like to be there when a vote is taken on doing so. Bruce County admits that it is largely symbolic and that they are unable to override the GEA. That's just fine. It sends a strong statement to the mountain of mismanagement going on in Toronto and it speaks up on behalf of those who are tired, sick and displaced from the endless battle against turbines and from those who have LFN bombarding their homes and bodies.

I asked for this to happen nearly 8 years ago but not enough people were sick and displaced yet I guess.

It's long overdue for this County to represent the people living here, even if symbolically.

I would like to know what the process is to get this done. Please respond as promptly as is possible.

Thank you.

Lorrie Gillis
